PROFILE

Full Stack Developer with hands-on experience building production-grade web and mobile applications. Shipped At Facility — an end-to-end React Native + Fastify cab-booking platform targeting the Indian outstation market — from architecture to MVP. Comfortable across the entire stack: React, Node.js/Fastify, PostgreSQL, Redis, and AI integrations (LangChain, RAG, OpenAI). Focused on clean architecture, performance, and real user outcomes.

PROJECTS

At Facility — Outstation Cab Booking App — *React Native (Expo Bare) · Fastify · PostgreSQL · Redis · Prisma · Razorpay · Mappls API*

- Architected and built a full-stack on-demand cab hailing platform from scratch — driver dispatch, booking flow, payments, and live tracking for outstation trips across India.
- Implemented job-board-style driver dispatch: rides are posted as open jobs, upfront Razorpay payment locks the booking before drivers can see it — eliminating cancellation fraud.
- Built REST APIs with Fastify, Prisma ORM + PostgreSQL on Supabase, Redis (Upstash) for rate-limiting and caching, deployed on Railway with GitHub Actions CI/CD.
- Integrated Mappls REST API for routing, MSG91 for SMS/WhatsApp notifications, and Razorpay webhooks with HMAC validation for secure payment events.
- Designed business logic covering multi-day driver allowances, round-trip discounts, All-Inclusive vs. Exclusion pricing tiers, platform commission, and a strike-based driver cancellation system.
- Built in a Turborepo monorepo with NativeWind v4, Zustand state management, and separate driver/rider app surfaces.

ChaiCode AI Assistant — *Next.js 14 · Node.js · MongoDB · LangChain · Qdrant · OpenAI · Gemini*

- Built a full-stack AI learning assistant with course-aware RAG: LangChain + Qdrant vector DB retrieves context from course content, passing it to Gemini/OpenAI for accurate tutoring responses.
- Implemented JWT auth with Google OAuth 2.0; multi-model support lets users switch between Gemini and OpenAI mid-session.
- Designed real-time chat UI in Next.js 14 with shadcn/ui, streaming responses, and session persistence via MongoDB.

PersonaAI — Customizable AI Chat Platform — *React 18 · TypeScript · Node.js · PostgreSQL · Drizzle ORM · OpenRouter · Docker*

- Built an interactive AI chat platform with customizable personas; cyberpunk dark-neon UI using Radix UI and GSAP animations.
- Developed REST API with PostgreSQL + Drizzle ORM, protected routes, session-based auth; integrated OpenRouter for multi-model AI responses.
- Containerized with Docker and deployed on Render.

ThumbnailAI — AI-Powered YouTube Thumbnail Generator — *React · TypeScript · Vite · Node.js · MongoDB · Gemini · OpenRouter*

- Built an AI thumbnail generator: users describe a thumbnail in natural language, OpenRouter enhances the prompt, Gemini generates the image.
 - JWT auth with Google OAuth, generation history stored per user in MongoDB; deployed on Vercel (frontend) + Render (backend).
-

TECHNICAL SKILLS

Frontend	React, Next.js, React Native (Expo), TypeScript, JavaScript, Tailwind CSS / NativeWind, Redux, Zustand, Radix UI, shadcn/ui, Framer Motion, GSAP
Backend	Node.js, Fastify, Express.js, REST APIs, FastAPI, JWT Auth, Google OAuth 2.0, Razorpay Webhooks, WebSockets
Databases	PostgreSQL, MongoDB, Redis (Upstash), Prisma ORM, Drizzle ORM, Supabase, Qdrant (vector DB)
AI / ML	LangChain, LangGraph, RAG pipelines, OpenAI API, Gemini API, OpenRouter, LLMs, Agent SDK, Generative AI
DevOps	Docker, GitHub Actions CI/CD, Railway, Render, Vercel, Turborepo monorepo
Tools	Git, GitHub, Postman, VS Code, Python

EDUCATION

Bachelor of Computer Applications (BCA) · [Maharaja Surajmal Institute](#)

Senior Secondary (Class XII) · [Bal Bhavan Public School](#)
